Description

This course provides a comprehensive introduction to Brazil's regions and cultural history, to Brazil's unique place in the Americas, and to its place in the world of Portuguese language. It presents major topics in the panorama of Brazilian cultural history and civilization from 1500 to the present through readings on regions, cultures, peoples, and arts, including the architects of Brazil's national cultural identity, its chronological development, and modern self-description. Topics include discovery and rediscovery of Brazil, baroque architecture, romanticism and empire, regionalism, immigration, urbanization, and modernization. The main texts draw on a cultural history of Brazil through selected writings by major authors and scholars. The course features an individual creative project on the student's experience in Brazil to be presented in Portuguese during the final two classes.

Requirements

No absences allowed in YSS. Two objective tests during weeks 3 and 6 (40%) covering important names, documents, and events from the readings. Preparation and oral participation in each class discussion required (20%). Each student will prepare an original project on a specific interest in Brazil, coordinated with the professor (25%), presented in class on July 20. Final review essays cover major figures, themes, and events in Brazilian cultural history from readings and class discussion (15%) due July 21.

Daily assignments. Identify and discuss events, authors, and themes from readings and question sheets for each class. Prepare for class discussion from the assigned readings for each meeting. Keep a detailed notebook and use the study guides provided.
